Victorian Drain & Cavity Location List
1st Edition. (C) 2010

H H S W DESCRIPTION OF LOCATION TO ENTRANCE OF TUNNEL MAP GRID
MINES. There are many more mines around Vic so contact us with details of any half-decent ones that you know of. We have about 50 not on this list.

CAYYYVE (THE) :| 1 - Northwest corner where Rose/Steel Creek meets the Maribyrnong River. 27 J-4
DIAMOND CREEK (X3) :| S # Follow trainlines towards city from Diamond Ck station. Mines are on the left between 2nd & 3rd bridge.
Some belly crawling required. Would be :) if it weren't so dangerous (as of late 90's). Caves in regularly! 12 A-8
TOORAK'S ARSEHOLE :(1 W Between train line bridge & St Kevin's College on south bank of Yara along bush track. 59 A-1
WALHALLA :) S B There are about 20 abandoned mines around Walhalla. VR81 J-9
WARRANDYTE (X4) :) S E West end of Tunnel St in State Park. Five different mines. Good day out. 35 F-2

There are a lot more cavities than this list shows & some that are listed probably no longer exist (let us know). This list requires major work or it may even be discontinued due to the problems with entering many of these locations -- that'd pretty much mean that you'd need local knowledge to enter these locations (which is already the case with many of the more sensitive cavities). A decision will be made during 2010.

CAVITY LOCATION LIST INSTRUCTIONS
RATING: This column gives you a vague opinion on what we think of the item.
:(= Plain & fairly featureless. :| = Average with a feature of 2. :) = Well worth the visit.
SECTINS: This column indicates roughly how many sections or chambers there are in each item (S = More than 9 sections).
HASSLE: This column tells you what the main problem is; B = Being seen. E = Entrance hard to find. F = Fenced off.
W = Water level. H = Hard to enter. L = Low section. P = Passing structure. % = B + H. # = E + P.
An "*" after the hassle letter indicates that the cavity may be locked.

WES'S TOMB	2.2	Y	Y	T	Flooded entrance on Rippleside Beach.				MEL 442 B-10 :
WODONGA	1.8	N	N	0	Location not recorded. May be east side of Melrose Dve.				VR 652 J-6or8 : (

DRAIN LOCATION LIST INSTRUCTIONS. Entrances shown in italic should be done first to get the most out of the tunnel.

HEIGHT (H): This column gives you an estimate of the height of the entrance to the tunnel metric.
HIGHER (GB/H): THIS column indicates if the tunnel Gets Bigger/Higher than the entrance.
SHAPE (SC/S): This column tells you if the tunnel changes shape from the entrance.
WATER (W/WL): This tells you roughly how deep the "entrance" to the tunnel is;
0 = nil; 1 = 10cms deep etc... B - Boat required. T = Tidal (do at low tide).
RATING (R): :) = Excellent drain :| = A couple of features. May have boring &/or awkward sections.
:(= Average. Only do if you are already in the area.

The "rating" column is just a vague description just to give you a rough idea of what the tunnel is like.
The tunnels are usually smellier, deeper and more slippery just after rain.
